

SPRC ^a	Data element	Response			
<i>The below elements align with the RCPA Invasive Carcinoma of the Breast Structured Reporting Protocol (3rd ed, 2022)</i>					
	Fresh tissue received	No	Yes	<i>If yes, describe any additional tests/ frozen sections/biobanking performed</i>	
	Number of specimens received	—			
S1.04	Localisation performed (e.g., clip, carbon, radioactive pellets, magnetic seeds etc)	Yes	No	Not known	
For each specimen, record the following:					
	Intraoperative consultation performed	No	Yes, specify type	Frozen section Imprint cytology	Gross exam. for margin assessment Other, specify
	Specimen orientation	Not orientated		Orientated	<i>If orientated, list markers & locations and colours used. Record the plane of dissection in orientated specimens (e.g. medial to lateral/ superior to inferior/ superficial to deep).</i>
S1.06	Operative procedure	Not specified Additional specimens, specify		Excision (less than total mastectomy): - Therapeutic wide local excision - Duct excision/microdochectomy - Re-excision	Total mastectomy: - Simple mastectomy - Nipple-sparing mastectomy - Skin-sparing mastectomy
G1.02	Cold ischaemic time and time in fixative	Compliant with RCPA Guidelines			Other, specify
S2.01	Specimen laterality	Left	Right	Not specified	
	Specimen dimensions	__x__x__mm Medial-lateral length __mm		<i>If orientated, record as follows:</i> Superficial-deep length __mm Superior-inferior length __mm	
	Specimen weight	__g			
	Specimen details – Depth of tissue excised	Skin to deep fascia:		Yes	No
	Specimen includes:				
	Skin	Absent		Present	<i>If present, record dimensions & describe any abnormalities.</i>
	Skin dimensions	__x__mm			

Breast tumour

Macroscopic reporting dictation template

	Skin abnormalities	Absent	Present, <i>select all that apply</i>	Ulceration	Satellite nodules	Other, <i>specify</i>
	Nipple	Absent	Present	<i>If present, describe. Select all that apply.</i>		
	Nipple description	Normal	Paget's disease	Peau d'orange	Other, <i>specify</i>	
	Skeletal muscle	Absent	Present			
S2.02	Tumour site	Not specified		Distance from nipple __mm	Position, <i>specify</i> __o'clock	
		Other, <i>specify</i>		OR: Upper outer quadrant Lower outer quadrant Central	Upper inner quadrant Lower inner quadrant Nipple	
S2.03	Block identification key	Text	<i>Describe nature and site of blocks</i>			
<i>The below elements align with the RCPA Surgically Removed Lymph Nodes for Breast Tumours Structured Reporting Protocol (1st ed, 2022)</i>						
S1.04	Method of localisation (e.g., clip, carbon, radioactive pellets, magnetic seeds etc)	___		Number of fiducial markers (e.g., clips) placed ___		
S1.05	Operative procedure	Sentinel lymph node biopsy			Targeted axillary dissection (excision of clipped node and sentinel nodes)	
		Axillary lymph node dissection: - Level I - Level II - Level III		Non-targeted lymph node sampling, <i>specify</i>	Other, <i>specify</i>	
S2.01	Specimen laterality	Left	Right	Not specified		
	Location (axillary, internal mammary chain, supraclavicular etc)	___				
S2.02	Number of lymph nodes examined	Total lymph nodes identified ___				
	Total number of sentinel lymph nodes identified	___		<i>Only required if sentinel lymph nodes are submitted by the surgeon.</i>		
	Total number of non-sentinel lymph nodes identified	___		<i>Non-sentinel lymph nodes include:</i> <i>1. any lymph node submitted by the surgeon as 'non-sentinel lymph node' at the time of sentinel lymph node biopsy; and</i> <i>2. axillary lymph nodes from an axillary lymph node dissection.</i>		
S2.03	Block identification key	Text	<i>Describe nature and site of blocks</i>
