

Data element	Response			
Fresh tissue received	No	Yes	<i>If yes, describe any additional tests/ frozen sections/biobanking performed</i>	
Orientating anatomical landmarks or orienting sutures	Not provided	Text	<i>Only report if present (by the clinician & feature denoted e.g. suture at 12 o'clock)</i>	
Specimen description	Text	<i>Record a description of the specimen (e.g. procedure or specimen type such as ellipse, excision etc. and the site and laterality as stated by the clinician)</i>		
Tumour site	Not specified	Text, specify		
Specimen orientation	Not provided	<i>Specify, describe method of orientation by the clinician and feature denoted (e.g. suture at 12 o'clock)</i>		
Specimen dimensions	Length x width x thickness ___ x ___ x ___ mm			
Number of lesions	___			
<i>Record the dimensions and a description of each lesion</i>				
Macroscopic primary lesion dimensions	Length x width x depth (depth is optional) ___ x ___ x ___ mm			Indeterminate
Distance of lesion to closest margin	___	Specify margin		
Macroscopic primary lesion description <i>inc. cut surface of lesion</i>	Text	<i>E.g. shape, colour, border, contour, pigmentation, ulceration, surface crusting & proximity to resection margins</i>		
Other lesion(s)	Not identified		Present	
Macroscopic description of other lesion(s)	Text	<i>E.g. shape, colour, border, contour, pigmentation, ulceration, surface crusting & proximity to resection margins</i>		
Presence of any scar or graft	Not present		Present, specify size ___ mm	
Distance between lesions	___ mm			
Differential inking of the specimen	Text	<i>List the margins and colours painted. A diagram is recommended</i>		
Method of sectioning	Text	<i>Record how the specimen was sectioned for processing</i>		
Macroscopic margin status				
Invasive carcinoma	Involved by carcinoma, specify location(s) ____, if possible			
Peripheral margin	Cannot be assessed	Involved	Not involved	Distance of tumour to closest margin ___ mm
Deep margin	Cannot be assessed	Involved	Not involved	Distance of tumour to closest margin ___ mm
Photographs of intact and sliced specimen(s)	<i>Record information regarding photographs</i>			
Other macroscopic comments	Text	<i>E.g. any additional information; specimen integrity (if disrupted); additional anatomical components</i>		
Block identification key	Text	<i>Nature and site of all blocks</i>		

Refer to [Structured Reporting of Cancer Pathology](#) for current details of Standards and Guidelines
